## REQUEST FOR DESIGN PROPOSALS

for

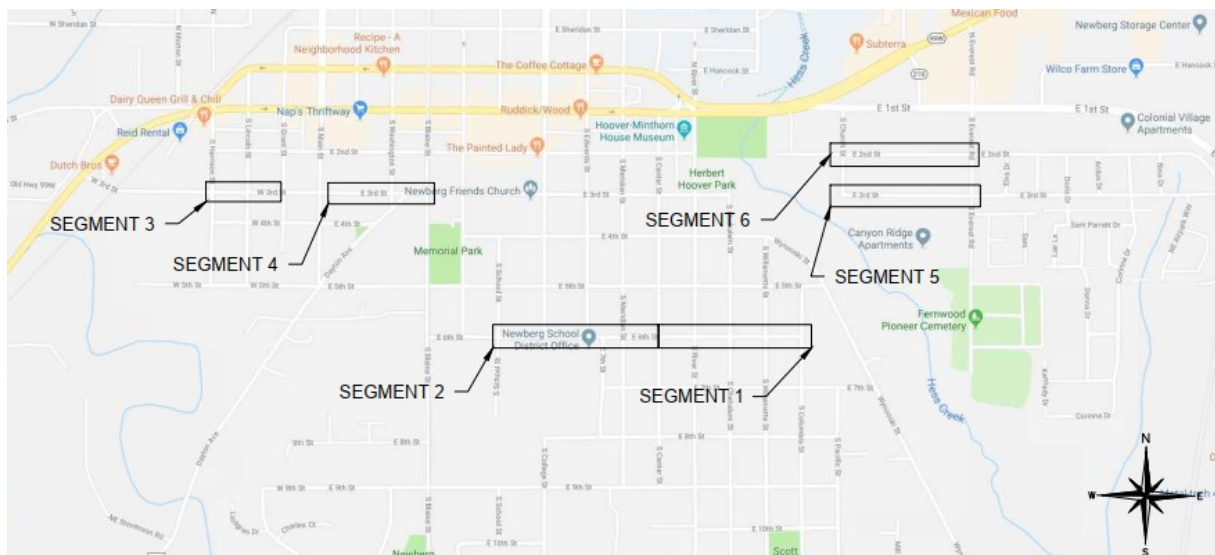

### Second Street, Third Street & Sixth Street Wastewater Replacement Project

October 29, 2018

The City of Newberg, through the Public Works Engineering Services Division, is requesting design proposals from firms (hereinafter referred to as the "Consultant") qualified and interested in providing professional engineering services to the City for the **Second Street, Third Street & Sixth Street Wastewater Replacement Project**.

The City of Newberg is located approximately 24 miles southwest of Portland, on the northeast side of Yamhill County, Oregon. Several sections of existing wastewater lines on E Second St, E Third St, W Third St and W Sixth St are in need of rehabilitation. The goal of the project is to replace segments of wastewater line within E Second Street (+/-800 linear feet), W Third Street (+/-460 linear feet), E Third Street (+/-1440 linear feet), and E Sixth Street (+/-2700 lineal feet). Some manholes and wastewater service laterals within the right-of-way of the project areas may also require repair or replacement. Design must also include confirming the limits of improvements and a comparison to the current City of Newberg Wastewater Master Plan requirements to confirm that pipes are sized appropriately. Design and construction phases shall be completed in time to allow for a separate pavement rehabilitation project to begin in summer 2019.

Visit the City website: <https://bids.newbergoregon.gov/> for RFP information. Post questions at the same website.
